

I am looking forward to seeing a 60-meter band for amateur use. I am already equipped to operate on this band, should it be allocated today.

I would hope this band would be structured similar to the 160-meter band, with no mode boundaries, and a 1500-watt power limit. I would also like to see the entire band open to all general class and above amateurs, with no divisions for Advanced, or Extra class licensee's.

Thank you,

Ed Santavicca, AA8TV
